Mileage log — continuation page

One row per trip, logged the same day. The odometer never forgets; the rest of us do. Page two carries spare rows and the year roll-up; photocopy extras as the year grows.

WARM TIP

Two habits make this painless: **keep the pen with the sheet in the car**, and **transcribe odometer photos on Sundays**, ten quiet minutes. Leave rows clean rather than guessing — this page lives in your tax folder, so it should hold only what you actually know.

This is a paper organizer, never tax, legal, or financial advice.
